

Ability to Persist in Addressing Complex Problems

Criteria	Capstone 4	Milestone 3	Milestone 2	Benchmark 1
Develop strategies for persistence	Reflects on the consequences of multiple problem solving strategies	Identifies multiple strategies for persisting in problem solving	Identifies a strategy for persisting in problem solving	Acknowledge the need to identify problem solving strategies
Respond productively to setbacks, errors, and failures	Reflects on what was learned from a specific experience with error, setback or failure	Demonstrates perseverance despite setbacks, errors, or failures	Identifies examples of working through setbacks, errors, or failures	Acknowledge that setbacks, errors, or failures may occur when solving problems
Create processes that lead to effective problem solving	Reflects on what was learned from experimenting with a range of creative problem solving approaches	Experiments with several ways to approach a problem	Identifies several ways to approach a problem	Acknowledge more than one way to approach a problem while maintaining a preference for original approach
Develop a broad system of people and resources to support creative problem solving	Reflects on engaging with a system of people or resources relevant to a specific problem solving process	Engages with several people or resources in the problem solving process	Identifies and describes several people and resources that might help in addressing the problem	Acknowledge that there are people and resources that are relevant to addressing a problem
